EMS Sky Connect Offering Special Year-end Pricing on Forté™ In-flight Connectivity Systems

Customer Deliveries by Dec. 31 Qualify for Discounts of up to \$3,500

TAKOMA PARK, Md. – Dec. 1, 2009 – Fixed-wing aircraft and helicopter operators considering an in-flight phone or tracking system will realize significant cost savings by taking advantage of special year-end offers from EMS Sky Connect, a division of EMS Technologies, Inc.

Customers who take delivery of a Forté™ Satcom phone system by December 31, 2009, will save up to \$3,500 with free airtime for a period of two years, up to a maximum of 2,000 free minutes of airtime. The Forté system delivers in-flight connection functionality for cockpit and cabin, enabling passengers and crew to continue doing business anywhere they fly.

Likewise, those who take delivery of a FLEET by December 31, 2009, will receive up to two years of free tracking, a \$2,800 savings. FLEET is the aviation industry's preferred choice for Satcom tracking, voice, and/or text solutions, and is considered by many customers to be integral to the success and safety of missions such as emergency medical service and offshore oil.

"This is a limited year-end opportunity and a great time to save on these mission-enhancing products," said Wiley Loughran, senior vice president of sales and marketing for EMS Sky Connect. "It's ideal for customers who are already considering a system, or who have aircraft maintenance scheduled in early 2010." To place an order, customers should contact their local avionics dealer or visit www.fortemail.com/FreeAirtime or www.fortemail.com/FreeTracking for more information.

EMS Sky Connect has more than 4,500 satellite communication systems flying worldwide.
